BLINX

INTRODUCTION

Blockchain technology is a recent invention used to solve different security problems every day. For instance, a cryptocurrency like BNB is used to make payments, transfer money, and pay for services such as digital advertising in a fast and secure manner. Moreover, our BNB-based community token aims to help draw likeminded individuals together to build an ecosystem of charity tokens revolving around our Flaghip token BLINX.

Our token revolves around these 4 core Principles:

Safe & Secure

Blockchain technology is a recent invention used to solve different security problems every day

Automated Liquidity

Blockchain technology is a recent invention used to solve different security problems every day

Low Dilution

Blockchain technology is a recent invention used to solve different security problems every day

Reward Distribution

Blockchain technology is a recent invention used to solve different security problems every day

ABOUT BLINX

BLINX is community token that will bring forth many more charity tokens that will help raise awareness for different organizations by donating a percentage of all transactions to a cause that our community is eager to help.

We will vote within our community each quarter to award a charity per new charity token created.

WHAT WE HAVE PLANNED

Our token is a flagship for many more numerous charity tokens that will be created to support a specific charity for each trade.

We feel the best way to support the BSC token ecosystem is to give a worthy cause to the trading platform and the users of our tokens. We see so many tokens that rise and fall because they simply have no ambitions or goals to help humanity.

BLINX aims to tackle this issue.

TOKEN DISTRIBUTION

Total supply is 1 Trillion

50% is available for the presale.

5% of all transactions go towards adding liquidity on Pancake Swap

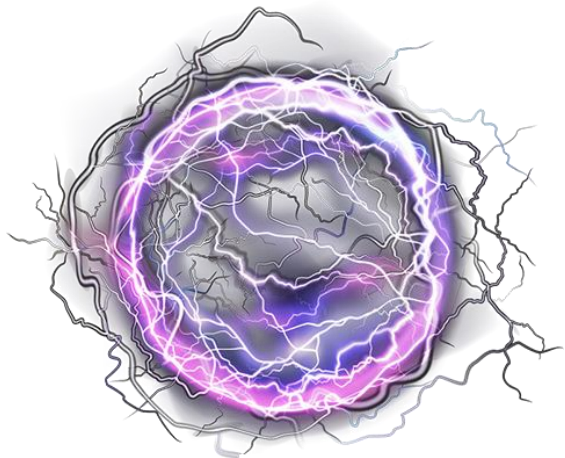

10% of all transactions will be redistributed to current BLINX holders

AFFILIATE PROGRAM

During our initial Pre-Sale of the BLINX token we will offer an affiliate program that awards any member who refers a new member to purchase our BLINX token in the Pre-Sale Round.

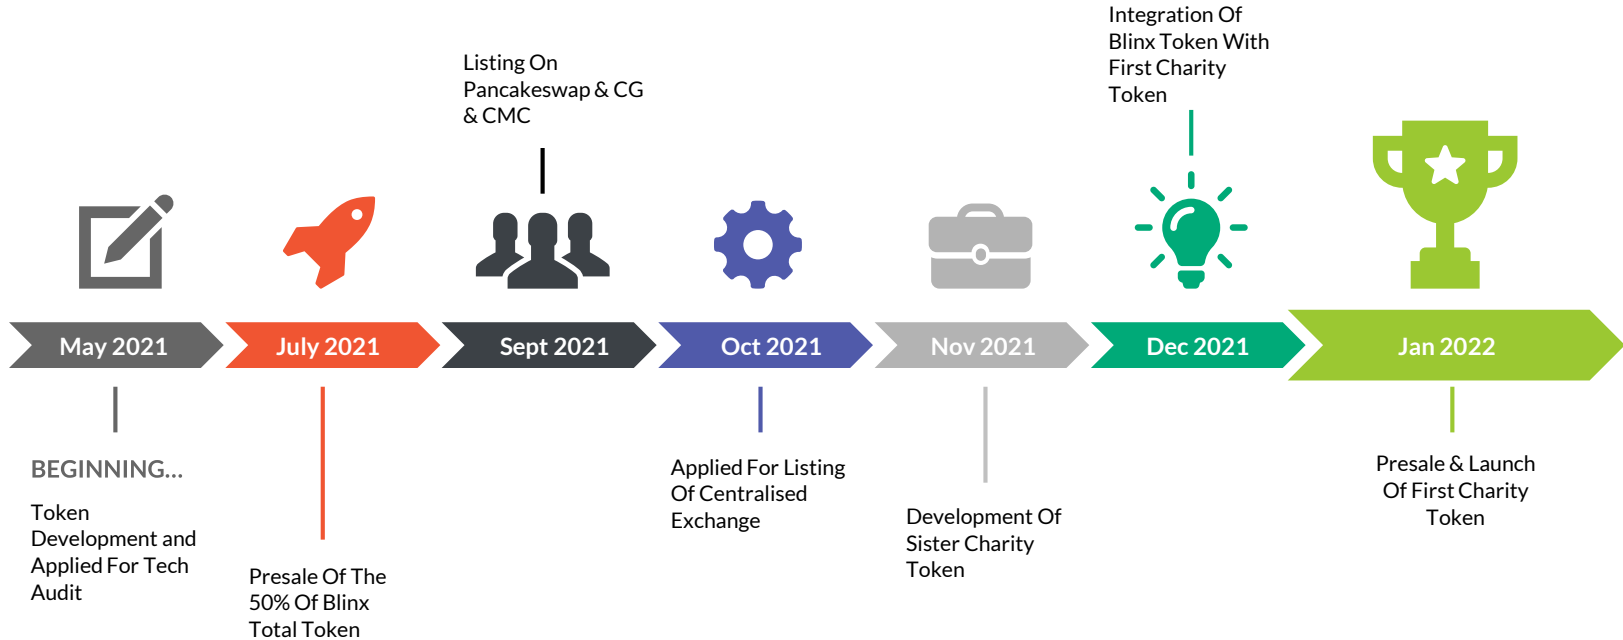

BLINX TOKENS

TOKENOMICS

Max Supply	1,000,000,000,000
Automatic LP	Every Trade Provides 5% Automatic Liquidity
Redistribution Reward	Token Holders Receives 5% Rewards From All Transactions
Monthly Burn	1% Of Blinx Will Be Burned To Limit Supply After The Presale

BLINX ROADMAP

BLINX TOKEN FUTURE PLAN

With the Flagship token BLINX, we see endless addons to help fuel our community.

We want BLINX to bring awareness to multiple charities across the globe. Once BLINX is listed on pancake swap, we will look into adding it to a centralized exchange as well as applying to be listed on both Coin Gecko as well as Coinmarketcap.

Once listed we will begin working on our first charity token to help fulfill our mission.

THANKS
